

# Kyra's Photography Portfolio

# About Kyra

I started getting into photography when I was probably 11/12.. It was all iphone photos though and I loved doing yearbook because it taught me more about taking photos and I got to take photos of more things. Before doing yearbook the photos I took were mostly of still objects and nature but doing yearbook I started to love to photograph people and sports such as football and basketball. I chose this assignment because I wanted to learn to edit my photos through photoshop.

Black and white

When taking this photo it was a pretty nice, bright April day so I had to adjust my settings a little bit. I first adjusted my shutter speed and then my F-stop. Then I put it into photo shop and made it black and white and adjusted my exposure a little bit.

colored

I didn't adjust too much while taking this as I was already outside taking photos so my camera was ready. I did however adjust my F-stop so I could get that flower nice and clear with a burry background.

colored

The lighting in redlodge was a bit darker than in Billings so I turned my shutter speed down. Then this sign was in the shade so I had to turn it down even more.

Black and white

When taking this photo it was kind of cloudy so my settings didn't need to be that high. Then I put it into photo shop and make it black and white and adjusted my exposure a little bit.

colored

It was mostly sunny while taking this so I did have to adjust my shutter speed a little but not too much. I did however change the F-stop so I could get that cool blurry background affect.

black and white

Getting a photo of this web was a lot more challenging than I expected, I had to constantly adjust the settings and my position while taking it. Then I put it into Photoshop to fix it a little more by adjusting the exposure and white balance.

Altered

I took this picture as driving so that was a little difficult to get it perfectf but then i found one that turned out alright. I put it into photoshop and adjucted the expuse and balanc-es, then I sharpened it and added grain.

colored

This was probably the hardest photo I took because it was so bright outside and the white flowers were tricky. I had to constantly adjust and readjust all my settings then I finally got one that looked sorta good.

black and white

This photo honestly was super easy I just pointed and shot and it really didn't need to be adjusted so I just turned it black and white and put it in.

Black and white

I love this photo! It was cloudy already so I just stood in the middle of the street and shot and it turned out pretty nice. after turning it black and white I did have to adjust my white balance though.

colored

I didn't adjust too much while taking this as I was already outside taking photos so my camera was ready. I did however adjust my F-stop so I could get that flower nice and clear with a burry background.

Altered

This photo is literally adorable. I just took it and put it in photoshop and added the filter 'turquoise and red' and sharpened it up and added a grain.

altered

I had to adjust my settings a little because the light coming in through the window was super bright. Then I just took it and put it in Photoshop and added the filter 'Vintage instant' and sharpened it up and added a grain and vignette.
